U. S. Serial No. : _____

Requester's Name: Shefali Patel
 Phone No. : 306-4182
 Fax No. : _____
 Office Location: PK 1 4A07
 Art Unit/Org. : 2621
 Group Director: _____

Is this for Board of Patent Appeals? _____

Date of Request: 12-2-00

Date Needed By: 12-2-00

(Please do not write ASAP-indicate a specific date)

*too old for
Machine
Translation*

Phone: 308-0881
 Fax: 308-0989
 Location: Crystal Plaza 3/4
 Room 2C01

4T too old

SPE Signature Required for RUSH:

Document Identification (Select One):

**** (Note: Please attach a complete, legible copy of the document to be translated to this form)****

1. _____ Patent Document No. JP 03-182976
 Language _____
 Country Code 1991
 Publication Date _____
 No. of Pages _____ (filled by STIC)

2. _____ Article Author _____
 Language _____
 Country _____

3. _____ Other Type of Document _____
 Country _____
 Language _____

Document Delivery (Select Preference):

_____ Delivery to Exmr. Office/Mailbox Date: _____ (STIC Only)

_____ Call for Pick-up Date: _____ (STIC Only)

To assist us in providing the most cost effective service, please answer these questions:

Will you accept an English Language Equivalent? (Yes/No)

Will you accept an English abstract? (Yes/No)

Would you like a consultation with a translator to review the document prior to having a complete written translation? (Yes/No)

Check here if Machine Translation is not acceptable: (It is the default for Japanese Patents, '93 and onwards with avg. 5 day turnaround after receipt)

STIC USE ONLY

JOINING METHOD FOR DIGITAL PICTURE

Patent Number: JP3182976
Publication date: 1991-08-08
Inventor(s): ITAGAKI TSUGIO; others: 01
Applicant(s): SUMITOMO METAL IND LTD
Requested Patent: ☐ JP3182976
Application Number: JP19890321731 19891211
Priority Number(s):
IPC Classification: G06F15/66; H04N1/387
EC Classification:
Equivalents:

Abstract

PURPOSE: To attain the automatic joint of pictures by extracting two particle parts formed by means of the specified number of picture elements as characteristic particles and joining two pictures by means of a straight line connecting the centroid coordinates of two characteristic particles in two pictures.

CONSTITUTION: Two digital pictures 1MA and 1MB which are overlapped and image-picked up are density-converted so that density becomes equal, and are binarized. In respective pictures, two particle parts composed of the specified number of the picture elements are automatically extracted as the characteristic particles (a), (b), a' and b'. Then the pictures are joined with the straight line as a joining line. For generating what is called a panoramic photograph by joining plural digital pictures which are overlapped and are continuously image-picked up, the difference of gradation, the incontinuity of a joining part and the like can be excluded and automatic joint is attained.
